UNSW Employability Strategy

Our Roadmap to Employability

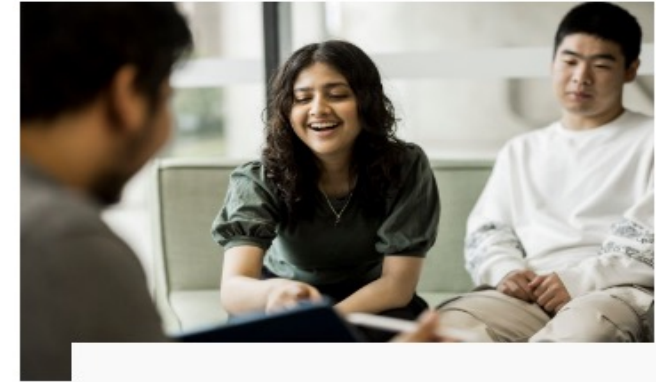

Discover

Discover your values, motivations, interests, and aspirations, and determine what this means for your future personal and professional ambitions. Our programs will help you identify which field of work you're interested in and relevant roles.

Launch

Launch your professional career by leveraging the knowledge, skills, experiences, and attributes you have developed. Build industry knowledge and connections in your chosen field and participate in programs that prepare you to apply for graduate roles.

Grow

Grow your career through accelerated personal and professional development. We'll guide you on how to transition into the workplace and support you to pivot your career to provide more meaningful and sustainable work in the future.

Alice

Hi, I am Alice. I am a first year Bachelor of Commerce student. I have been working in my family restaurant for the past year and I am now working as a tutor. I was also a prefect in high school. I chose BCom because I like business and marketing, but I am unsure which majors to choose to set me on the right path for this career. I've also heard data analytics may be a good course to choose but I don't know what that is about. While I am at university, I want to develop my leadership skills and I am keen to start exploring internships.

Rishi

Values and Strengths

Hi, I'm Rishi. I am a first year Bachelor of Computer Science student. I am excited but a little nervous about starting university. I am not sure what to expect at Uni. I want to meet people and maybe do some volunteering or get a part time job. I chose this degree because my teachers and my parents said there are a lot of jobs in this field but I'm not sure. I want to find out about employers and jobs in computer science and talk to someone who works in computer science. I also want to learn more about what's expected in the world of work.

Employability

David

Hi I'm David. I'm studying Politics, Philosophy and Economics (PPE). I chose this degree because I enjoy these subjects. I am interested in pursuing a career in politics or consulting. I want find out about how I can develop the skills I might need for these careers and I want to be connected with people in these industries.

Freya

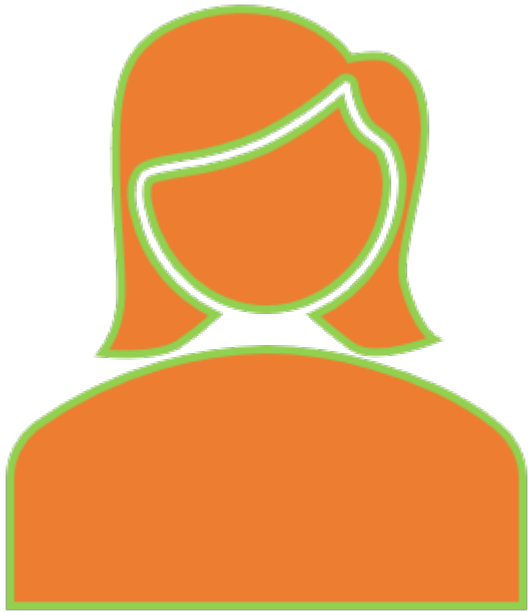

Hi I am Freya. I completed my Bachelor of Science honours degree, and I am now studying my Master of Science – Microbiology and Immunology

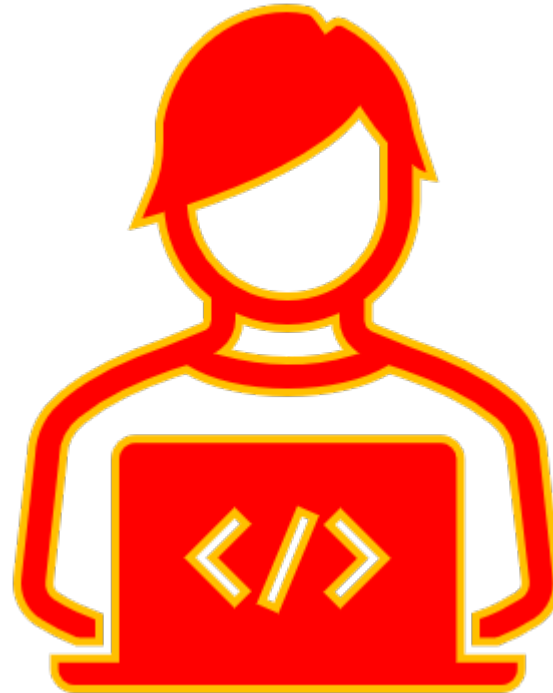

I want to develop my teamwork skills and gain confidence in public speaking. I also want to learn more about opportunities in public health. I live at one of the colleges on campus and I am interested taking on a position in the college, maybe as a Social Director?
