Women in Construction

A guide to find available
construction degrees and
relevant qualifications
in Australia

UNSW
SYDNEY

The School of Built Environment at UNSW was awarded a \$2.3m grant by the Department of the Prime Minister and Cabinet's Office for Women, under the Australian Government's Women's Leadership and Development Program.

This booklet lists available higher education degrees in construction and relevant qualifications in Australia. We developed this booklet to help those who would like to pursue education and build their careers in construction.

The information in this document was gathered from the websites of higher education providers.

Construction Management degree

This list includes construction degrees and qualifications offered by Australian universities from AQF level 5 (Diploma) to AQF level 8 (Bachelor honours degree). The degrees and qualifications included cover construction management, construction technologies and building surveying.

Other related degrees

This list includes other degrees related to construction, such as postgraduate degrees in related fields, and degrees in property and construction law, from AQF level 5 (Diploma) to AQF level 9 (Master's degree).

Notes to be considered:

- 1 The study duration offered by some providers may be shortened depending on the applicant's work experience. Please contact the education providers for more information.
- 2 The location refers to the physical location. However, if it is marked 'online', it means the program is only delivered online.

- 3 Some programs may have different physical locations due to different enrolment times or may require students to travel between campuses or offer a blended delivery mode.

* The information is current as of 25 Sep 2023
