Course Details

Units of Credit 4

Summary of the Course

The thesis provides an opportunity for you to bring together engineering principles learned over your previous years of study and apply these principles to innovatively solve problems such as the development of a specific design, process and/or the investigation of a hypothesis. Thesis projects are complex, open-ended problems that allow room for your creativity, and the acquisition, analysis and interpretation of results. There are multiple possible solutions or conclusions at the outset and sufficient complexity to require a degree of project planning. The thesis requires you to formulate problems in scientific or engineering terms, manage an technical project and find solutions by applying scientific and engineering methods. You will also develop your ability to work in a research and development environment. You must identify a supervisor and project prior to enrolling in this course.

Course Aims

The thesis provides an opportunity for the student to bring together engineering principles learned over their previous years of study and apply these principles to innovatively solve problems such as the development of a specific design, process and/or the investigation of a hypothesis. Thesis projects must be complex, open-ended problems that allow room for student creativity, and the acquisition, analysis and interpretation of results. There must be multiple possible solutions or conclusions at the outset and sufficient complexity to require a degree of project planning from the student. The thesis requires the student to formulate problems in engineering terms, manage an engineering project and find solutions by applying engineering methods. Students also develop their ability to work in a research and development environment.

Course Learning Outcomes

- 1. Develop a design or a process or investigate a hypothesis following industry and professional engineering standards.
- 2. Critically reflect on a specialist body of knowledge related to their thesis topic.
- 3. Apply scientific and engineering methods to solve an engineering problem.
- 4. Analyse data objectively using quantitative and mathematical methods.
- 5. Demonstrate oral and written communication in professional and lay domains.
- 6. To solve biomedical problems by applying CLO 1-5

Teaching Strategies

The course is taught as an individual research project, to develop a level of research skills and autonomy.

Students in this cohort will complete their thesis over three terms (4+4+4) or over two terms (4+8). A summary of the assessment is as follows

Thesis A: It is intended that Thesis A cover the scoping, planning, and completing preparations for the project. Students must have completed this assessment and passed in order to enroll in BIOM4952. This course is worth 10% of your final thesis grade.

Thesis B: The primary intention behind Thesis B is to ensure students stay on track with their projects

and project work as they progress through the year. This subject is worth 10% of your final thesis grade. **Thesis C**: Thesis C continues the project work. The key deliverable is the Written Report, alongside a poster presentation. This subject is worth 80% of your final thesis grade

Upon successful completion of this course, your transcript will read E.C for BIOM4952 and BIOM4951.

Upon completion of Thesis C, the final grade will be calculated and reapplied to BIOM4951 and BIOM4952.

Additional Course Information

There is no official class time for this course. You must still ensure your **enrolment and registration** is up to date in your enrolment. Your face-to-face time needs to be organised with your supervisor, as you are expected to meet them at least once per week.

Assessment

Students in this cohort will complete their thesis over three terms (4+4+4) or over two terms (4+8). A summary of the assessment is as follows

Thesis A: It is intended that Thesis A cover the scoping, planning, and completing preparations for the project.

Thesis B: The primary intention behind Thesis B is to ensure students stay on track with their projects and project work as they progress through the year.

Thesis C: Thesis C continues the project work. The key deliverable is the Written Report, alongside a poster presentation.

Assessment task	Weight	Due Date	Course Learning Outcomes Assessed
Seminar Progress Presentation	10%	Week 10 (identify a time with your supervisor and assessor)	1, 2, 3, 4, 5, 6

Assessment 1: Seminar Progress Presentation

Submission notes: Students must nominate an assessor by Week 6. Students must arrange a time to complete the assessment with their supervisor and assessor.

Due date: Week 10 (identify a time with your supervisor and assessor)

- This seminar will be presented to the supervisor, their research team and an additional academic assessor. It will involve the student detailing the background, motivation for their work, progress completed so far and a critical reflection on their work.
- Students must organize a time with their supervisor and find second assessor.
- Students are responsible for sending out invites to supervisor and assessor.
- It will be presented online via Microsoft Teams or face to face (social distancing restrictions pending).
- For students doing 4+4+4, there is an expectation that the student will have preliminary results by this point, and seminar will be in Week 10.
- For students doing 4+8, the results should be almost finalised by this point, and the seminar will be held in Week 3 of the second term. This gives students the opportunity to revert to 4+4+4 prior to Census Date if their progress is deemed unsatisfactory.
- Note: You should discuss with your supervisor early in the second term to identify a suitable time to complete the assessment task.
- Length: 20 minutes
 - 15 minutes Seminar
 - 5 minutes questions
 - Total time 20 minutes

Marking form (outside UNSW)

Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

Course Schedule

No lecture recordings available

View class timetable

Timetable

Date	Туре	Content
Week 7: 11 July - 15 July	Online Activity	Organise an Assessor for your seminar. The seminar will be marked by supervisor and assessor
Week 8: 18 July - 22 July	Online Activity	Organise a presentation time with your supervisor and assessor.
Study Week: 8 August - 11 August	Presentation	Upload a copy of your slides via the link on Teams, prior to your presentation
	Presentation	Present your seminar to your supervisor and assessor at the pre-arranged time and date.

Resources

Prescribed Resources

Resources will be made available to help students guide them in their journey for Thesis B.

Extensions

You can apply for <u>special consideration</u> when illness or other circumstances interfere with your assessment performance.

Other applications for extension of submission of thesis reports (e.g. equipment breakdown, etc.):

- 1. Discuss the possibility of an extension with your supervisor first.
- 2. Requests can then be lodged by the student here http://tinyurl.com/yy2jzpyv. The supervisor will then receive an email asking them to approve, before it is escalated to the decision panel.
- 3. Request must be lodged by Week 6 of term.
- 4. Panel decision will be made by end of week 7.
- 5. The decision will be made by a panel consisting of the HoS (or their nominee), Thesis Coordinator, and 1 other person.
- 6. Students should be alerted to the fact that this is not guaranteed, and thus should not rely on getting an extension.
- 7. Typically, extensions are granted UP TO 3 weeks. The length of the extension needs to be requested and justified by the supervisor. Panel will decide the length of time granted.

8.

Procedure if you fail Thesis A, B or C

Fail in Thesis A (interim report mark < 50%) – must re-enrol in Thesis A again.

Fail in Thesis B (seminar mark < 50%) – must re-enrol in Thesis B again

Fail in Thesis C – Students have three options.

- 1. re-enrol for Thesis A, B and C again, new project and supervisor
- 2. re-enrol for Thesis C again, same project needs consent of an appropriate supervisor & student
- 3. Student does further work, re-submits thesis after a max of 6 weeks. *Course* mark capped at 50%. If still not satisfactory, then needs to re-enrol.

This last option is only available if the original mark was ≥40, OR if the student is in their last semester before graduation (regardless of the original mark).

Fail in Thesis B & C (when taken simultaneously) – Students must re-enrol in Thesis B again, and cannot concurrently enrol in C. They can then take Thesis C when Thesis B has been satisfactorily completed.

Industry based projects

We encourage students to seek partnerships with industry, so students can have a co-supervisor from

industry. However, if confidentiality is required, a confidential disclosure agreement (CDA) is obligatory. The agreement will protect the intellectual property rights of the industry partner, UNSW and the student. Students or academics are **not authorised** to sign confidential disclosure agreements on behalf of UNSW and are advised to talk to the course coordinator and UNSW legal office to arrange for drafting and signing of the confidential disclosure or research agreement.

To complete an industry-based thesis, you must complete the following steps:

- 1. Identify an industry supervisor and share with them these guidelines.
- 2. Identify a GSBmE Academic who can be your academic supervisor.
- 3. Complete this <u>Industry thesis permission form</u> and make sure your industry supervisor AND your academic supervisor have signed the form.
- 4. Upload the signed form here (you may need to log in with your zID@ad.unsw.edu.au and zPass).

Late Procedure

In all cases, applications for late submission can be applied for BEFORE the due date. This is at the discretion of the thesis coordinator but should only be granted in exceptional circumstances. As per normal, students can also apply through myUNSW for special consideration.

For Thesis A, B or C, 5 marks will be deducted off the *thesis* for every day late. Penalty applies until the marks for the *course* decrease to 50, and further lateness does not result in failure of the *course*, but might be a failure of the thesis (weekends count as days).

Recommended Resources

Not available

Submission of Assessment Tasks

Laboratory reports and major assignments will require a Non Plagiarism Declaration Cover Sheet.

Assignments should be submitted on time. A daily penalty of 5% of the marks available for that assignment will apply for work received after the due date. Any assignment more than 5 days late will not be accepted. The only exemption will be when prior permission for late submission has been granted by the Course coordinator. Extensions will be granted only on medical or compassionate grounds under extreme circumstances.

Academic Honesty and Plagiarism

PLAGIARISM

Beware! An assignment that includes plagiarised material will receive a 0% Fail, and students who plagiarise may fail the course. Students who plagiarise will have their names entered on a plagiarism register and will be liable to disciplinary action, including exclusion from enrolment.

It is expected that all students must at all times submit their own work for assessment. Submitting the work or ideas of someone else without clearly acknowledging the source of borrowed material or ideas is plagiarism.

All assessments which you hand in must have a <u>Non Plagiarism Declaration Cover Sheet</u>. This is for both individual and group work. Attach it to your assignment before submitting it to the Course Coordinator or at the School Office.

Plagiarism is the use of another person's work or ideas as if they were your own. When it is necessary or desirable to use other people's material you should adequately acknowledge whose words or ideas they are and where you found them (giving the complete reference details, including page number(s)). The Learning Centre provides further information on what constitutes Plagiarism at: https://student.unsw.edu.au/plagiarism

Academic Information

COURSE EVALUATION AND DEVELOPMENT

Student feedback has helped to shape and develop this course, including feedback obtained from online evaluations as part of UNSW's as part of UNSW's myExperience process. You are highly encouraged to complete such an on-line evaluation toward the end of Term. Feedback and suggestions provided will be important in improving the course for future students.

DATES TO NOTE

Refer to MyUNSW for Important Dates, available at: https://my.unsw.edu.au/student/resources/KeyDates.html

ACADEMIC ADVICE

For information about:

- Notes on assessments and plagiarism,
- Special Considerations,
- · School Student Ethics Officer, and
- BESS

refer to the School website available at http://www.engineering.unsw.edu.au/biomedical-engineering/

Supplementary Examinations:

Supplementary Examinations for Term 2 2022 will be held on (TBC) should you be required to sit one.

This course outline sets out description of classes at the date the Course Outline is published. The nature of classes may change during the Term after the Course Outline is published. Moodle should be consulted for the up to date class descriptions. If there is any inconsistency in the description of activities between the University timetable and the Course Outline (as updated in Moodle), the description in the Course Outline/Moodle applies.
