5. Project Description

Briefly describe the scientific contributions of your project and the potential impact of the project. How does your proposed project meet the requirements of the funding scheme you are applying for. Please include Rationale, Project Aims/Objectives, Methods/Approaches, Team Capability, Significance/Outcomes

Maximum 650 words

6. Project Outputs

Describe the plans for project outputs and external funding opportunities. (Outcomes may include submit/preparation of ethics application and/or a proposal for an external funding scheme with a timeline for submission)

Maximum 300 words

7. Collaborative gain

Outline how the team will work together to achieve project outcomes and how this will be measured. Include current or potential consumer involvement.

Maximum 400 words

8. Project Budget

Provide the total funds sought and a breakdown of how the grant funds will be spent. Detail any new leverage investment, expected return on investment and pathway to sustainable future funding.

Maximum 300 words

9. Project Plan (up to 2 pages long, not included in the 6-page page limit)

Detail the project plan from inception to completion. Where possible, include SMART objectives (specific, measurable, achievable, realistic, and time-bound) and consider knowledge translation.

Project objective	Activity	Timeframe	Evaluation measure(s)

10. Approval and Sign-off

The Project PIs confirm that the information provided is correct and all team members have reviewed and approved the submission.
