CyberPolicyHub Reference Guide

Cyber Security Policy Framework

Updated: 24 April 2024

The MyCyberHub platform now includes a CyberPolicyHub function. The CyberPolicyHub is a searchable central directory for all Cyber Security Policies, Standards and Guidelines. The function supports Business Owners, Information Service Owners, Technical Subject Matter Experts (SMEs) and other UNSW staff to understand their Cyber Security obligations.

This reference guide has been created to assist you in navigating the platform or you can refer to the how to navigate overview video.

Refer to the Cyber Security Policies and Standards webpage for information on the Cyber Security Policy Framework, or visit the Cyber Security Strategy & Governance webpage for all support services.

Navigating the CyberPolicyHub

1. **Go to MyCyberHub** and select **CyberPolicyHub** from the top menu bar.

2. **Search for relevant Cyber Security clauses**

   a) Make your selection using the filters:

   - Risk Rating
   - Topic
   - Related Roles
   - Asset Type

   b) Once you select the appropriate filters, relevant sub-causes will be shown in the table.
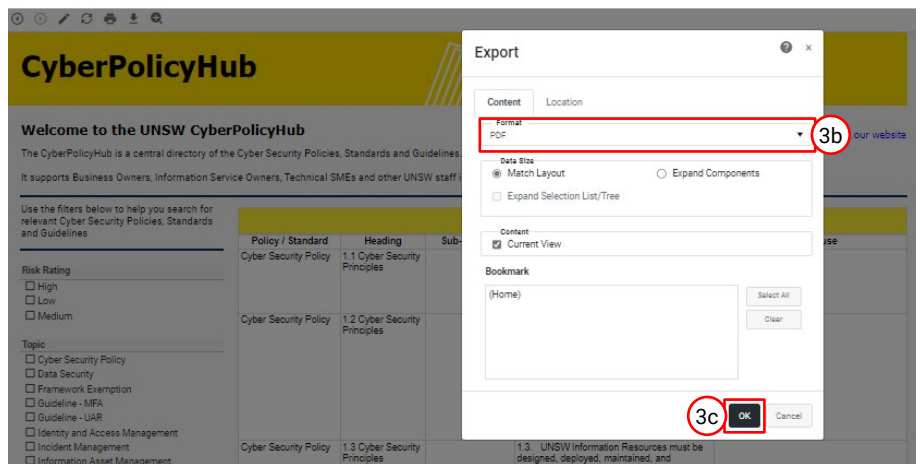

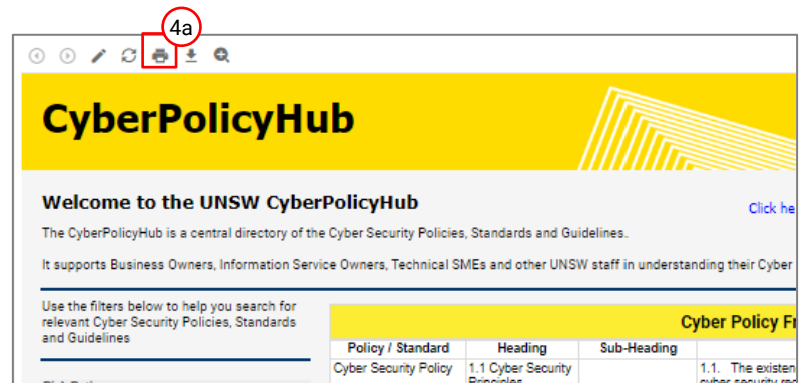

3. **To save the search results as a PDF**

   a) Select the Export icon.

   b) In the pop-up window click the down arrow and select **PDF** as the preferred format.

   c) Click **OK** to export the data.

4. **To print the search results**

   a) select the **Print** icon and proceed to print the item.

Congratulations, you have successfully navigated the CyberPolicyHub.
