

The UNSW AED preferred supplier is Australian Defibrillators (www.aeds.com.au).

Contact: Paul Jones

Email: paul.jones@aeds.com.au

Mobile: 0414 330 910

Preferred Purchase Model

AED: Zoll AED Plus Fully Automatic Defibrillator (7 year warranty).

AED Cabinet: 300 Series Monitored AED Cabinet (12 months limited warranty).

The UNSW preferred supplier offers free 15 minute training session on the use of the AED, once it has been purchased and installed.

The UNSW first aid training courses also include operation of an AED.

Location Requirements

1. Immediately Accessible (during normal office hours) sign posted area. For example; Front entrance, reception area
2. A cabinet should be purchased as a convenient store for the AED
 - The 300 series cabinet is monitored continuously to ensure the AED is always functional and has heightened security in the event that an AED is removed from the cabinet. Other cabinets have a simple alarm sound when the AED is removed.
3. The 300 Series Monitored AED cabinet requires a near-by power outlet and data/communication cable.
 - Contact your Client Facilities Manager to arrange these if not already present
4. Most defibrillators are supplied with AED wall signage; one should be positioned next to the AED/cabinet and another outside the building, to indicate there is an AED inside

Once you have purchased and positioned your AED inform UNSW Health and Safety ohs@unsw.edu.au, so that it can be added to the campus map of AED's.
